

## FOR IMMEDIATE RELEASE

### J.D. Cousins, Inc. and EvapTech, Inc. announce a joint marketing agreement to provide energy efficient industrial closed loop evaporative fluid coolers.

**(BUFFALO, NY & LENEXA, KS 8.12.14)** J.D. Cousins, Inc. and EvapTech, Inc. today announced a strategic partnership to co-market EconoCool, a closed-loop industrial evaporative cooler product. The EconoCool technology is a highly-efficient, cost-effective solution for large scale cooling of fluids that provides engineers and owners with many benefits:

- Lower Capital Costs
- Lower Horse Power Consumption
- Lower Process Outlet Temperatures
- Smaller Plot Area
- Water Conservation-can use low quality water for spray water make up
- High Availability—Robust, simple design results in easy maintenance which can be accomplished while fluid cooler is in operation

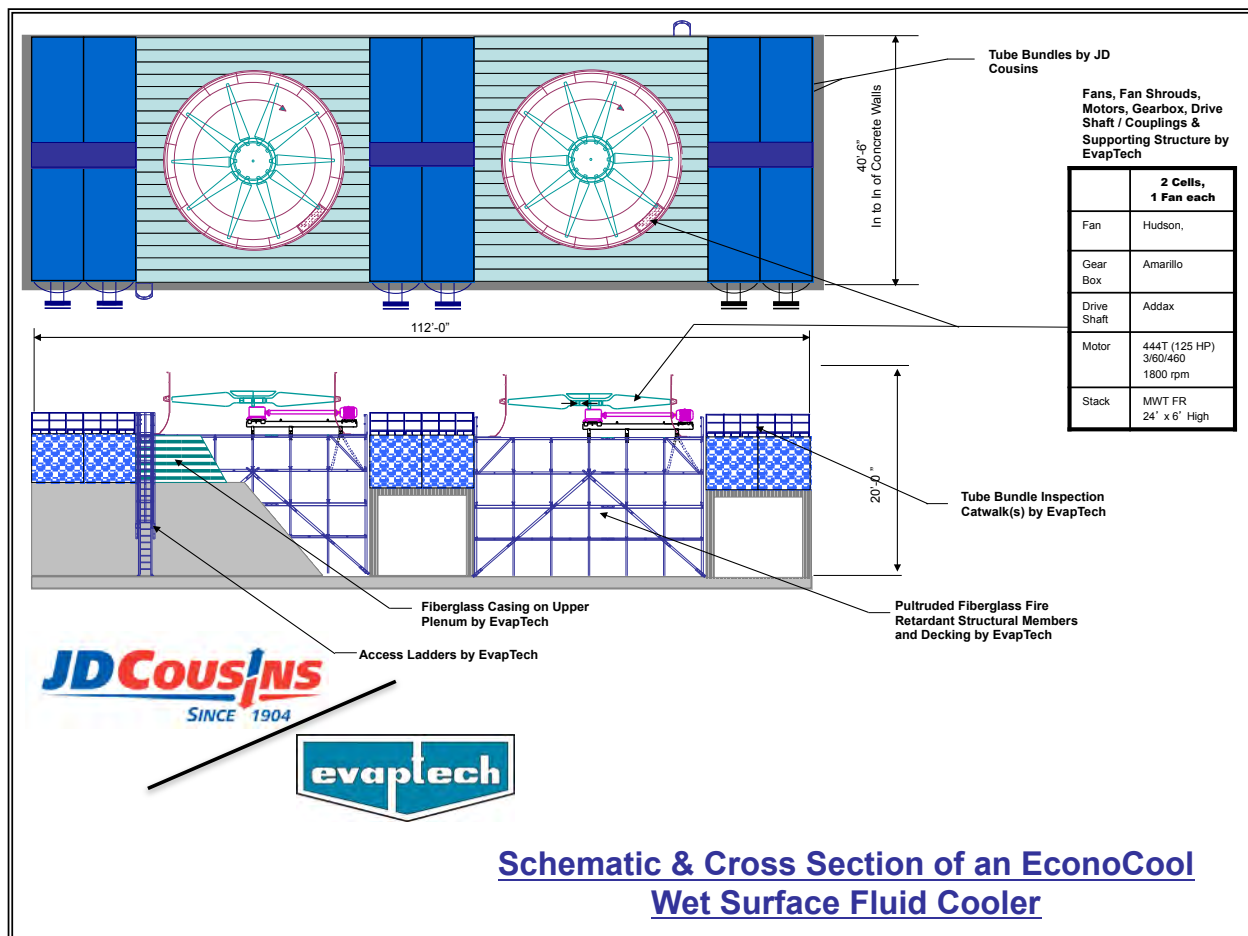

The advanced EconoCool technology uses a [closed loop evaporative system with a single step process](#). The technology provides an effective and efficient method of cooling process fluids or condensing gases compared with conventional technology (aircooled or cooling tower and heat exchanger combination.)

The EconoCooler is a custom engineered field-erected industrial heat exchanger engineered, designed, and guaranteed by J. D. Cousins.

EvapTech, a wholly owned subsidiary of Evapco, Inc. provides the state-of-art air delivery system, pultruded fiberglass fan deck, plenum sides, and support structure.

The below schematic illustrates a typical EconoCool fluid cooler with the features made possible by the joint marketing program between J. D. Cousins and EvapTech.

In May, the two companies were awarded a major contract to provide EconoCool technology for a submerged arc furnace fluid cooler for Mississippi Silicon in Burnsville, MS.

###

About JD Cousins: Founded in 1904, **J.D. Cousins** specializes in heat transfer and process equipment for over 100 years. Each product is custom-engineered and built in our state of the art manufacturing facility in Buffalo, NY. JD Cousins serves the power generation, ethanol production, chemical processing, steel, petroleum refineries, oil, gas, water conservation markets among others. To learn more about J.D. Cousins and the EconoCool product visit [www.jdcousins.com](http://www.jdcousins.com) or join us on [LinkedIn](#) or [Facebook](#).

About EvapTech: **EvapTech** is a premier cooling tower designer, manufacturer, and contractor providing Innovative Cooling Solutions for the satisfaction of customer needs in the power generation, industrial, refrigeration, and HVAC evaporative cooling markets. EvapTech offers new and replacement field erected cooling towers and a variety of field erected cooling tower parts and aftermarket services. To learn more about EvapTech [www.evaptech.com](http://www.evaptech.com).
